(c) Centre for Innovation and Entrepreneurial Leadership, ARSD College, University of Delhi, 2015

"In order to grow, India needs more jobs, it needs more entrepreneurs", said Mr. Ratan Tata in a recent conference of business incubators. In a time when start-ups have become substantial contributors to a country's economy, it becomes essential for India to boost the entrepreneurial minds of the country.

Taking a step in the right direction, Atma Ram Sanatan Dharma College becomes the first college of Delhi University to establish a 'Technology Business Incubator'. The incubator, titled 'Centre for Innovation and Entrepreneurial Leadership' aims to support budding entrepreneurs and provide them with a substantial platform for technical innovation.

ARSD-CIEL is an official body of the college, and has been established with the 'technology-entrepreneurship' grant of MSMEs (Micro, Small and Medium Enterprises) of the Government of India. The college is currently inviting formal proposals in the specified format from students, faculty and other entrepreneurs/incubates. The centre will enable them to try out their innovative ideas/processes/products at the laboratory or workshop stage. Once an idea qualifies the workshop stage, it will be backed with all the necessary aid/mentorship for further execution from the 'know-how' to the 'do-how' stage of setting up of a business.
